-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Applicant's election with traverse of group I in the reply filed on 12-28-05 is acknowledged. The traversal is on the ground(s) that claim 1 of group I can be read upon claim 33 of group III. This is not found persuasive because the combination including claims 33-61 does not include the particulars of the subcombination including claims 1-10. Applicant should note that all of limitations of all of the claims of a group are combined for restriction purposes.

The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S.

Patent 6,689,326 to Jackson.

With respect to claim 1, Jackson disclose a water treatment system (see FIG. 1) including a pump system 280 capable of delivering water from a well into a common reservoir 160, a solid-based sulfurous generator 40, 100 that produces sulfurous acid to treat the water contained in the water reservoir 160, and an injection system 320 capable of injecting soluble gypsum into the water. The limitations to the "coal-bed-methane water" relate to intended use and carries no patentable weight.

Art Unit: 1724

Concerning claim 2, Jackson includes a control system in the form of a pump 20.

A claim specifying a pump system for pumping water from one or more CBM wells to a reservoir, a recirculation loop including the reservoir, a pump, and a solid-based sulfurous acid generator, a discharge line leading from the reservoir, and an injector connected to the discharge line for injecting gypsum into the discharge line would be allowable over the art of record.

Claims 3-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew O. Savage whose telephone number is (571) 272-1146. The examiner can normally be reached on Monday-Friday, 7:00am-3:30pm.
